Local Happenings

Ira McBride was in Lethbridge on Tuesday.

Lou King was a New Dayton visitor Wednesday.

D. A. Bennett was in Lethbridge on business on Tuesday this week.

All roads will lead to Magrath on Saturday for the Taylor Stake Track and Field Meet. Be there.

A light shower fell on Monday night but not enough to stop operations on the land.

Mrs. Bacon, Mrs. Wm. Redd, Mrs. Ross, Misses Sybil Bacon and Phyllis Redd combined business with pleasure in Lethbridge on Thursday.

For the first time this summer the roads to Cardston via Magrath can be called good. There are two or three bridge approaches which need attention very badly and a few rough spots but generally speaking the road is in good shape.

Fred W. McIntyre chief Engineer of the Utah Idaho Sugar Co. was here from Thursday to Monday on an inspection trip, and expressed himself as well pleased with the condition of the local factory.

A one roomed house belonging to John Housley with his wagon and hay rack was burned during his absence to Waterton Park on Friday. The fire was out when he returned home Saturday morning.

The jury returned a verdict of accidental death and attached no blame to the driver J. G. Kerr, in the fatality on the Cardston-Magrath road last Wednesday afternoon, May 22 when R. A. Wright well known Lethbridge jeweler was killed. A rider attached to the report recommended that dangerous curves on the gravelled roads be marked.

Business Summary

PRAIRIE PROVINCES—Wholesale business generally has been quiet but is improving. Dealers in hardware, builders' supplies, implements and automobiles report a good volume of sales. Retail trade is disappointing. Spring and summer lines of goods are not moving freely owing to cold, unseasonable weather. Collections are normal. Cash wheat on the 20th instant closed at \$1.14 1/2 as compared with \$1.56 1/2 a year ago. Wheat prices have fluctuated widely within the last two weeks. A drastic break on May 7th resulted in a decline of 7c to 8c. Later May wheat touched \$1.08, but through support from export buying a part of the lost ground has been recovered. The cattle market has been active. Steers, lambs, sheep and hogs are up \$1.25, 50c, 50c, and 25c respectively. There were twice as many homesteads filed on in the Edmonton Land Titles Office during April as there were for the same month in 1928. Recent filings have been heavier than in the past twenty years.

(From Bank of Montreal Business Summary for the Dominion.)

Fire Engine Demonstrated

On Monday, Mayor Buchart, and two members of the Fire, Water and Light Committee of the Vulcan Town Council visited Raymond for the purpose of inspecting and investigating the local fire engine and equipment. Through the courtesy of Mayor Cope a demonstration was arranged at 2 p.m. two connections being made at the swimming pool and two at hydrants with 400 feet of hose laid. The visitors were well pleased with the equipment, particularly the pump which gave plenty of water for an ordinary fire and would give good protection as long as the water supply was sufficient.

Fire chief VanOrman had charge of the demonstration.

Don't Miss Submarine

The big picture which is playing for the balance of the week at the Capitol Theatre. This picture is really a mighty drama of the sea showing the rescue of a "Submarine" which has been rammed by a cruiser. It is replete with action drama love and thrill fully synchronized with a beautiful music score and sound effect. There will be 2 shows Saturday night the first one at 7.30 and a regular matinee Saturday at 2.15. It is to fine a picture to miss.

RAYMOND YOUNG PEOPLE HAVE MIRACULOUS ESCAPE

When the car skidded and turned over on the road from the Lakes just west of Cardston last Friday night, Frelen Dahl, Bill Fairbanks, Miss Dorothy Costley and Miss Gertrude Dahl miraculously escaped injury. They turned out to pass another car and when passing the other car turned back to the centre of the road and sped on. In trying to miss the other car Frelen got over too far and lost control of the car. It turned completely around and went over on its side, breaking the top, bending the fenders and the axle. It was righted again and driven on to Raymond on its own power and taken to Lethbridge for repairs. It was a sport Model Ford. How the occupants of the car escaped is the mystery.

A representative of R. G. Dun and Co. was in Raymond on Wednesday.

Twenty-four and a half cars of livestock shipped out of Raymond by the local livestock co-op. will show what mixed farming means to the district. Averaging 20 head of cattle to a car, 220 head of sheep and 80 head of hogs take your pencil at going prices and figure out how much money it means. These figures were obtained from I. B. Roberts, local shipper for the Co-op, and do not include shipments by private buyers and outside concerns.

Crop Report

Issued by Department of Agriculture, Province of Alberta, Edmonton, May 27, 1929)

Seeding of wheat has been practically completed over the province and approximately seventy-five per cent of the acreage intended for oats and barley has been sown according to telegraphic reports received by the Department of Agriculture on Monday. Work has been retarded to some extent in a number of districts in the south, but the remainder of the wheat acreage will be sown within the next few days.

Conditions in a number of northern and central districts have been materially improved by rains during the past week, and little concern is felt over general crop prospects from the moisture standpoint. Germination has been uniformly good and much of the early sown wheat is making rapid growth. Warm weather is required to promote continued growth, especially in areas where seeding has been delayed by a heavier than usual precipitation.

The season has been somewhat unfavorable for the early destruction of weeds as growth has been too slow to permit of much eradication by surface cultivation prior to seeding. Some localities report a considerable increase in the acreage of grain stub bleed in, and this will undoubtedly be reflected in greater difficulty in dealing with the weed situation in following years.

Beet seeding has been practically finished in the south and seed has germinated well. Some damage to the young plants is reported as a result of late frosts. A marked increase is noted in the acreage devoted to sweet clover, alfalfa and the other pasture crops.

A uniformly good stand of crops is reported in the Peace River district where seeding has been completed for sometime. All the wheat is above the ground and oats are making a good showing. The moisture supply in the soil is sufficient to carry the crop for some time and prospects generally are very promising.

Pastures are making satisfactory growth and livestock is in good condition. Shearing of farm flocks is expected to start shortly and under range conditions a start will be made within the next few weeks. Some losses have been experienced in the lamb crop on the range as the result of snow and rain during the lambing season.

Al. G. Barnes Circus Coming

The all new production of the Al. G. Barnes Circus is coming to Lethbridge June 12, for an afternoon and evening performance.

Advertising agents representing Al. G. Barnes have been posting pictorial circus bills in this vicinity announcing the coming of this excellent show, and advertisements will be found in our columns this week. The management of the Al. G. Barnes Circus announces the following features this year:

"The all new spectacle, entitled 'Aladdin and the Parade of Gold,' in which approximately 1,000 people take part, including the Chicago beauty, Lola Lee Chong; the two Mastodons, Tusko and The Mighty Tusko; Klindhardt's equestrian midgits, fourteen (14) horsemen from Bavaria; San Marcus, the \$16,000 equine star; the zebra round-up, with the largest herd in captivity in America; and many other novel features and performances given by American and foreign artists, also animals from every part of the world.

Two performances are given daily the afternoon starting at 2 o'clock, and the night performance at 8 o'clock. The doors are open one hour previous for the inspection of the zoo, and for the children to see the two mammoth beasts which require two specially constructed railway cars for their transportation."

News Notes

S. S. Newton, Cardston was in Raymond on Tuesday.

J. W. Low, Police Magistrate, Cardston, was here on Tuesday and heard one case of minor importance.

Don't forget the Taylor Stake Track Meet at Magrath on Saturday, June 1st; Be there and help your friends to victory.

Fill your gas tank before June 1st. The 5c tax goes in effect then and means an increase of 2c over what we have been paying. Looks like 40c gas.

Stake Priesthood Meeting and Board Meetings of the various auxiliaries convened on Sunday. Routine business occupied the time.

If you don't think advertising pays just watch the crowds through the local stores for the Wednesday morning specials. If you don't think Raymond is busy you should see it then.

W. G. Smith, of the Raymond Agriculture College purchased an Essex Coupe from C. H. Elder this week.

Mr. and Mrs. C. Nilsson returned on Wednesday evening from a two months trip to Utah. On Sunday last they said the ground was covered with snow in American Fork.

The Concrete Productions Co. of Regina, and the Anthes Foundry Co. Ltd., of Toronto and Winnipeg, have secured factory sites in East Calgary and intend building there in the near future.

The Southern Alberta Baseball League will be organized at Magrath on Sunday June 2. Raymond will field a good team this year and if they get the support they deserve we will be well represented. Manager Woolf is working hard to get them in shape for the opening of the league and promises some real games for the fans. Lets make this the banner baseball year of Raymond, and make this our slogan "I'm a Booster, not a Rooster."

The Southern Alberta Livestock Co-operative will spend nearly \$1,000 in facilities at the local stockyards to make shipping more pleasant and profitable for the producer. Grading corrals, a scale house and scales will be the main items. The scales are already ordered and will likely be installed before July 1st. I. B. Roberts has been one of the chief actors in getting these improvements through for the members of the local livestock association.

FINE TROPHY FOR CAMPAIGN AGAINST CROWS AND MAGPIES

Farmers, ranchers and other sportsmen, wishing to get pheasant eggs for hatching, and live pheasant chicks in connection with the stocking movement which is spreading rapidly throughout the province, have been able to secure supplies through the Calgary Fish and Game Association. The association operates without profit. It is actuated by the desire to help the stocking movement.

Those who are interested may secure information by communicating with the secretary of the Calgary Fish and Game Association, c/o The Calgary Herald.

The Alberta association and the local association are also conducting a vigorous campaign against crows and magpies. The suggestion emanating from the Hanna Fish and Game Association that a trophy for competition between the thirty-five locals in the province be donated, resulted in a generous contribution by Mr. A. E. Cross, of Calgary, of a trophy for this purpose.

The regulations respecting the trophy will be announced later.

The Alberta Association is backing up the U.F.A. and Alberta government in the war against pests.

High School Column

ODE TO RAYMOND HIGH SCHOOL When I have borne in memory who do teach

Great students; what ennobling things we learn

In Raymond High School every term, And countless joys we have while there Great pride I have in thee, old High School,

Because I there was trained. Now, when I think of thee and what thou art

Verily, in the bottom of my heart

Of thee, old Raymond High School, I am proud.

For dearly do we love thee; we who find

In thee the teachings for the youthful mind.

The banishing of ignorance blind. What wonder if your students now

and then Among the many troubles we are in, Think of thee in after days with eyes

by tears made dim!

SOFT BALL

Last Thursday the High School grounds was the scene of a one sided Soft Ball game. After trying to listen to the Empire Day program all the girls gathered at the Soft Ball ground to play the big game. It was played between the High School and the Public School girls. At the end of the game the score stood 29 to 8 in favor of the High School. The Public School girls show a lack of experience but are a good team and will do a great deal better next time. Mr. Low official Umpire handled the game to the satisfaction of all present.

The Empire Day program last Thursday was doubtless very fine, and as one student said, we heard it all. The only trouble was that the sound wereso mixed that we didn't know when the Premier stopped speaking and the orchestra started to play.

After challenging the H. S. girls to a soft ball game, and losing, the confidence of the P. S. girls was still high and they invited the H. S. down to play Volley ball. This resulted in a victory for the H. S. girls, but the other team will learn fast. We'll have to be careful next time.

DOUBLE FATALITY

AT LUNDBRECK

When their car skidded on the damp rocks near Lundbreck falls on Sunday, Geoffrey Knowles, Tony Nichols, Gladys Knowles and Lily Parsons were taken with the car over the 75 foot bank into the Old Man River. Geoffrey Knowles extracted himself from the car and Miss Parsons also got free. Miss Knowles was taken to shore but was dead when shore was reached, and the river is still being dragged to recover the body of Tony Nichols. The spot where the accident occurred is a favorite picnic place of the people of Crows Nest Pass.

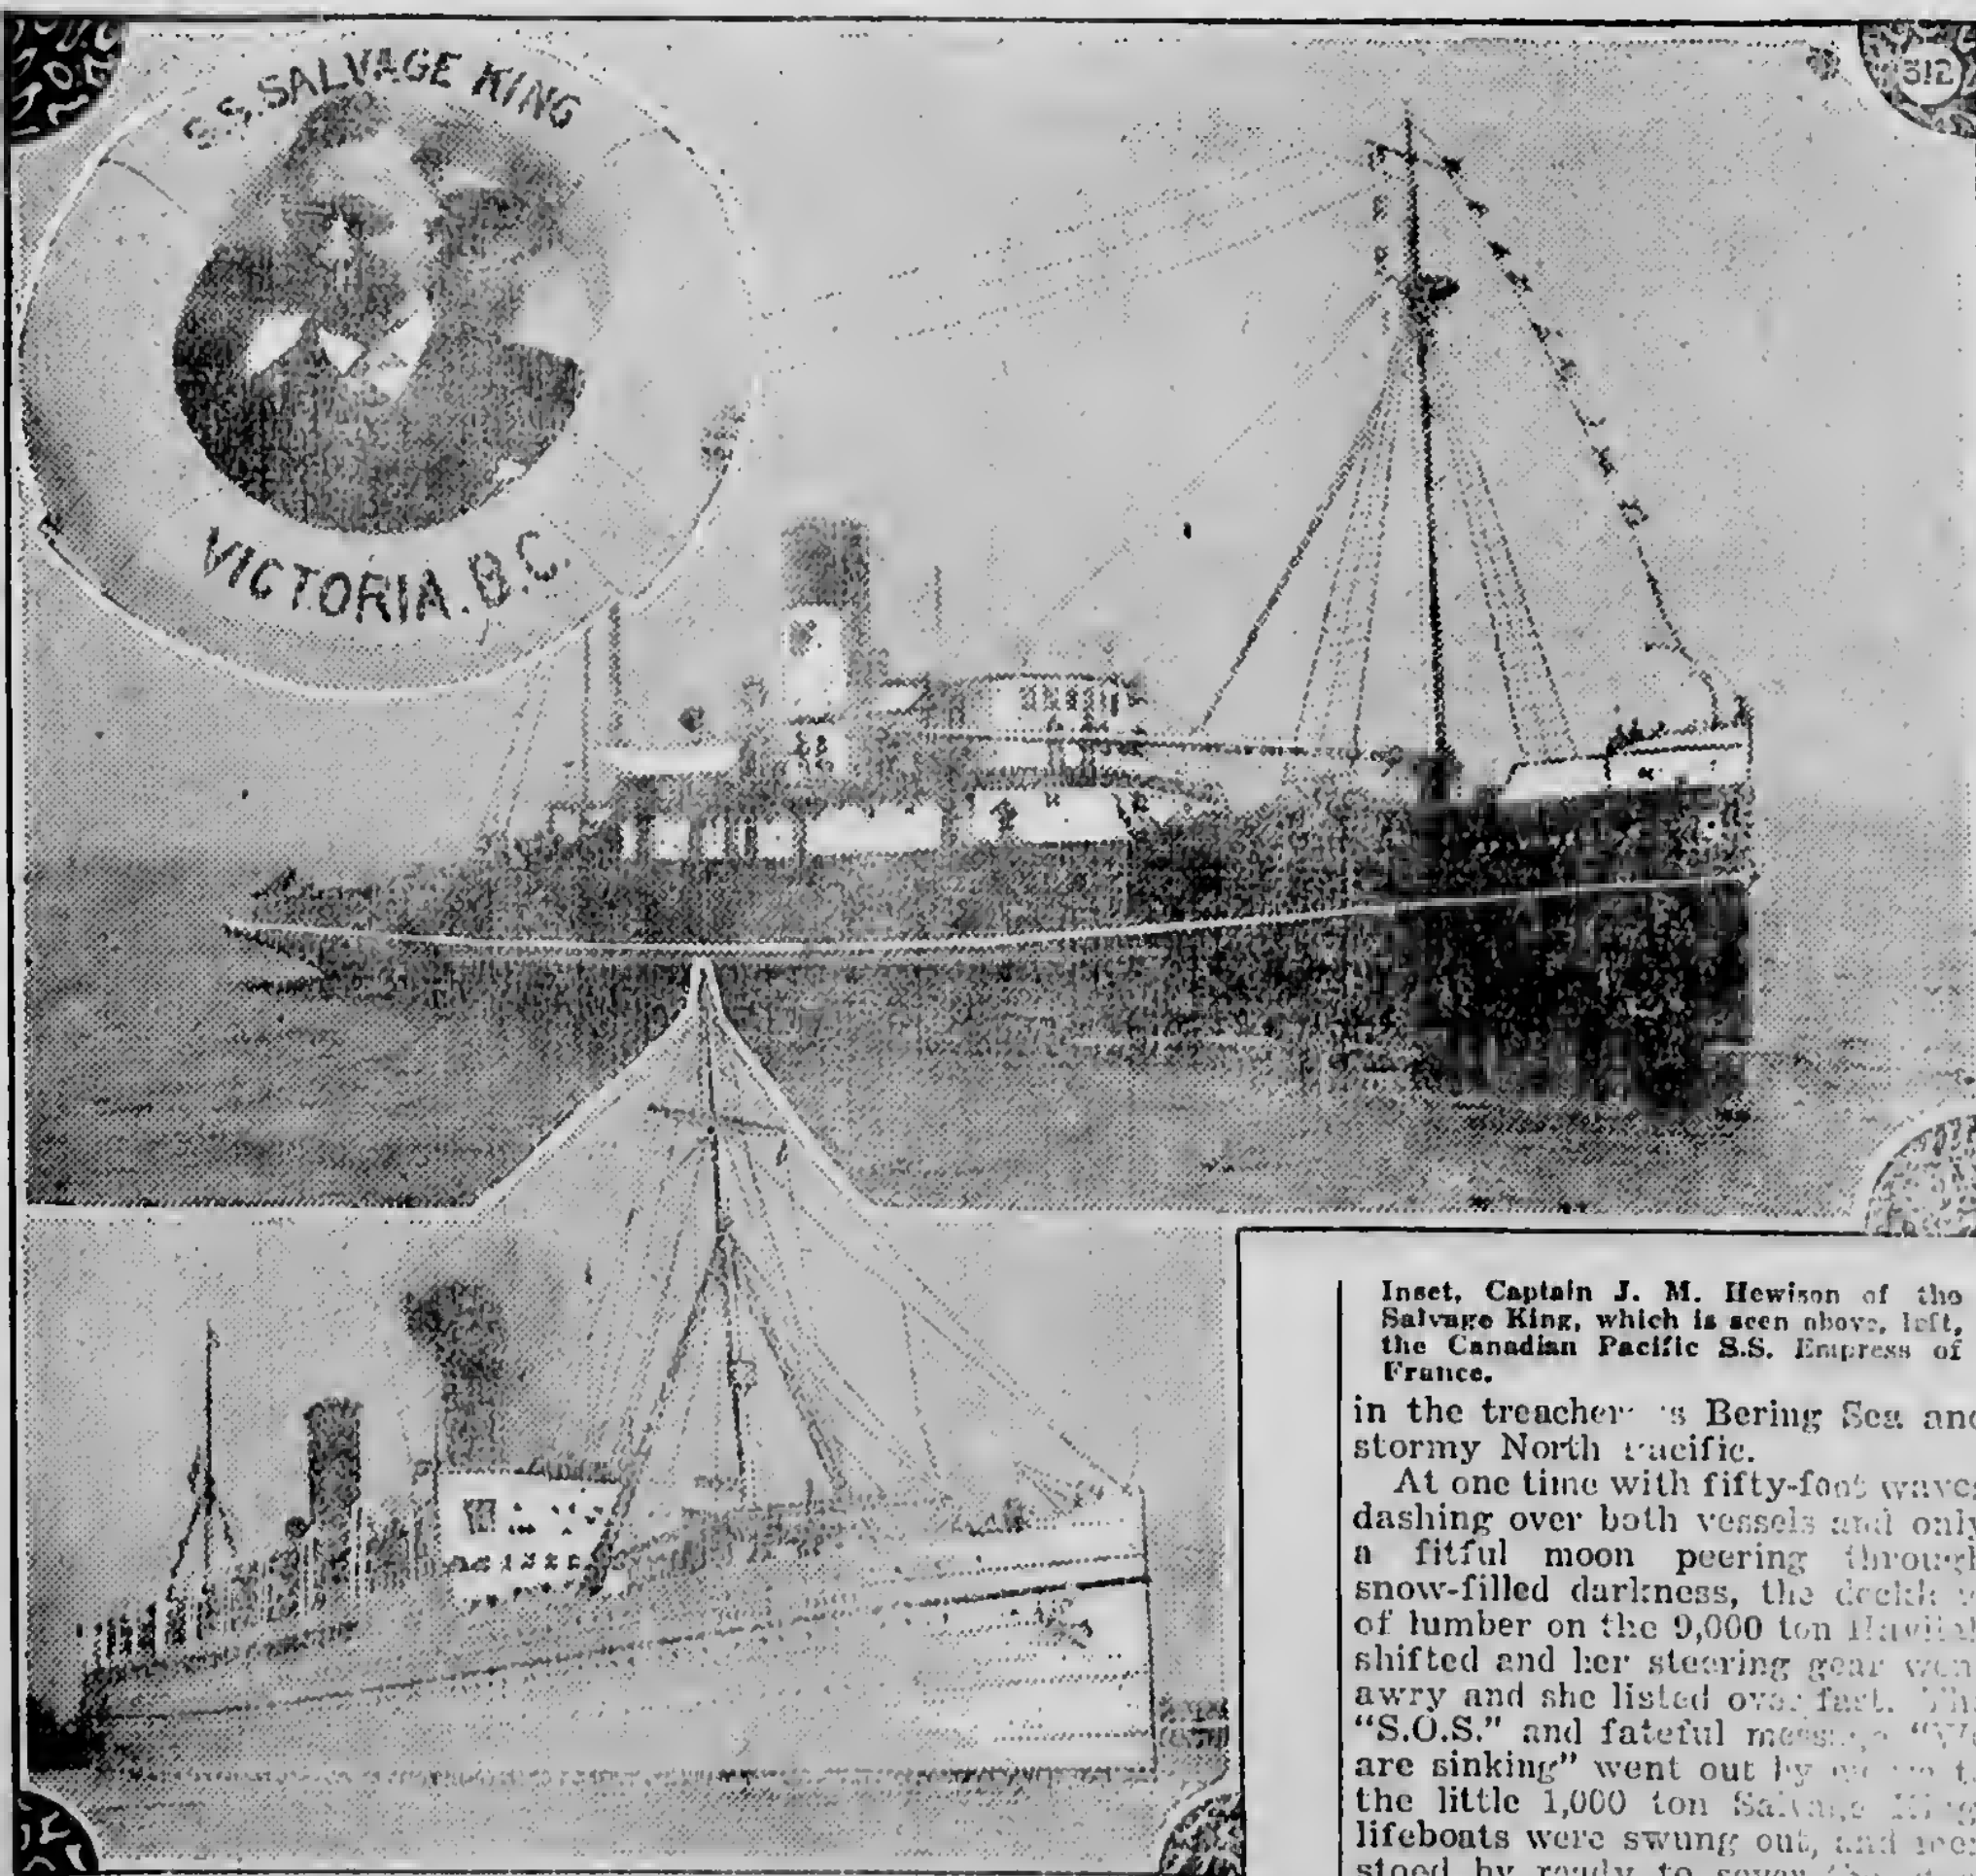

FROM WITHOUT

"Canada is a country of vast virgin resources," states James E. Boyle Professor of Agricultural Economics, Cornell University. "The United States is sometimes spoken of as the richest country in the world, due to the immense progress of both agriculture and industry in that country. The fact is, however, that Canada, is a country of large area and of far greater wealth in natural resources per capita. With a balanced development of Canadian resources, coupled with an equally balanced growth of those two great arteries of economic life—transportation and banking—Canada is destined to be the wealthiest country in the world. Already her export per capita have a value four times those of the United States."—News from the Mines.

He—You'll be sorry in years from now if you turn me down.

She—That's better than being sorry right away.

DRAMA OF SEA SALVAGE

WHEN the Canadian Pacific liner Empress of France and the Pacific Salvage Company's big steam tug Salvage King rubbed sides near the entrance to Victoria Harbour recently greetings were exchanged between two principal actors in an outstanding drama of Canadian seamanship. They were Captain Bunker, former master of the freighter Havilah, and Captain

J. M. Hewison, master of the Salvage King, the former being a passenger on the giant passenger liner.

The tug after sixty days out of her own port was returning after performing the heroic feat of towing the disabled freighter Havilah from Dutch Harbour, Alaska, to Osaka, Japan, through days of constant gales, terrific seas and under almost every kind of marine handicap, a distance of 3,100 miles

Inset, Captain J. M. Hewison of the Salvage King, which is seen above, left, the Canadian Pacific S.S. Empress of France.

in the treacherous Bering Sea and stormy North Pacific.

At one time with fifty-foot waves dashing over both vessels and only a fitful moon peering through snow-filled darkness, the deck of lumber on the 9,000 ton Havilah shifted and her steering gear went awry and she listed over fast. "We are sinking" went out by radio to the little 1,000 ton Salvage King. Lifeboats were swung out, and men stood by ready to sever the steel tow line with an acetylene torch. The freighter survived the storm, however, and was towed through gales and mountainous seas for nine more days to Osaka, Japan. When she met the Empress of France, on which the captain and crew of the freighter were passengers, she was completing a voyage of 19,000 miles. Captain Bunker performed a task that no other salvage vessel on the Pacific had been able to undertake.

WHY BURN THEM?

Last Friday evening the sky was illuminated with the leaping, crackling flames from the fires of straw-stacks south and west of Raymond a few miles.

It caused a remorseful feeling to come over us as we witnessed these hundreds of tons of good straw going up in smoke. Our minds went back to the hard winter of 19 and 20 when cattle and horses perished by the thousands because there was no straw for them, and we marvelled that people should so soon forget the sad lesson of that winter; and the hundreds of farmers and stockmen who are still suffering from their losses.

Oh well its only straw. Quite right but when everything else is gone and straw worth \$18 to \$30 a ton to keep livestock from dying, these brown stacks of straw would look like stacks of gold. True, they are in the way for summerfallowing, and they need watching when stubble is being burned, but they are well worth all of this in order to keep them until we have another year's straw in the same field.

As long as we are in the livestock business, and as long as we are gambling with the weather for hay grain and feed just so long do we need to be prepared for crop failures and one way of being prepared is to keep our straw-stacks. They make good protection at any time for stock that is wintered in the fields and to see them burned in the spring of the year when there is no certainty about a harvest this coming fall well we just can't see the philosophy of it.

THE DIFFERENCE

When you and I were young and grandmother and father were a power in the home, the home meant a great deal more to the country than it does today. In its operation there were multifarious duties and young people were brought up to understand that they had their share in these. We each had our chores, in and around the home, and by the time we were ready to step out and undertake the obligations of homemaking for ourselves we were fairly well trained in the art. And believe me, homemaking in its true sense is an art. But the old times have passed and new times have taken their place—new times in which home making is more or less a lost art. True, there are some homes which are still patterned on the old style, but they are few and far between. The age in which we happen to be living has pretty well forgotten just what a real home means or what it is. Our mode of life has changed to such an extent that to the average young person the home is little more than a place where one sleeps and eats, and only this when one doesn't happen to be eating or sleeping elsewhere. Most of the old obligations of home life have been forgotten or cast aside; much of the old time value of the home circle has been lost. And the result is that young people are today assuming the grave responsibilities of parenthood with little, if any, of the training so necessary and essential to success in that difficult role. Even worse than this is the fact that their ignorance does not trouble them at all. And it is this state of affairs—a result of changing living conditions that has aroused serious minded people to the need for some sort of special training to be given through organization of one sort or another, to qualify young people for future marital responsibilities and to raise unqualified young parents from their level of dense ignorance. Winnipeg has recently established a school for young parents, at which mothers and fathers are given much needed instruction as to how to bring up their children. In the industrial world we live in the age of machinery and mass production. In other days many of the things we now buy from the factory are used to make at home. It seems to be the same with our education. What we used to learn individually in the home as children we are now to get, if we get it at all, from the adult school class.—Alberta Farmer.

Quip—What's the matter with that physical wreck over there? Has he had the flu?

Quick—No hut he did everything people told him would keep it off.

MERRY-MAKERS CLUB ENTERTAIN

The Merry Makers Club met at the home of Mrs. Meeks on Thursday afternoon May 23, in honor of the 72nd birthday anniversary of Mrs. Milner. A very enjoyable afternoon is reported and refreshments were served. This is only one of a series of parties to be given by this club for the older ladies of the district. Those present were: Mesdames H. S. Allen, Zobel, Tollestrup and Meeks who were the hostesses; and Mesdames T. J. O'Brien, W. Nalder, O. B. Roberts, J. Nickerson, R. A. Van Orman, F. W. Ralph, A. W. Kirkham, J. Anderson, Erickson, Selman, Hutchinson, Hicks, Fisher, F. E. Milner, Woolley, Harris, W. C. Jensen, J. Stevenson, Palmer, Hancock, J. W. Allred, C. W. Lamb, Day, Buehler, Hickson, Holt, C. E. Allred, Mendenhall.

CONJOINT PROGRAM—2nd WARD

The M. I. A. had charge of the Program Sunday night in the 2nd Ward Chapel, where a large audience had gathered to listen to an address by Pres. Allen. The President gave a brief outline of his recent trip through the east where he visited a number of places of historical interest to the Latter Day Saints. His remarks were very interesting and instructive to the young people present as well as the older ones. The remainder of the program which was enjoyed by all was as follows—A Solo "Sonny Boy" Bp. Walker. A retold story—Helen Seoville "Our Slogan"—Phoebe Dahl Tithing—Lenore Seoville; Chorus—Group of Seagull Girls. Appropriate Choir music under the direction of C. E. Strong.

COMMERCIAL FERTILIZER OF GROWING IMPORTANCE

Must Be Produced in Increasing Amounts to Maintain the Fertility of Canada's Soil

The astonishing computation is made if the farmers of Canada were to entirely replace by chemical fertilizers the amount of plant food annually used it would entail a yearly expenditure of \$385,000,000. This figure, contained in a new report on "The Commercial Fertilizer Industry in Canada" prepared by the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, is not intended to create alarm but is merely informative. As a matter of fact the computation embraces the cultivated area of the prairie provinces where the soils are naturally very rich and there is a division of opinion on the present need of fertilizers there. Without considering the three prairie provinces the fertilizer bill would nevertheless be very considerable amounting to over \$141,000,000.

The fact is stressed that such computations are theoretical and of no practical value except as pointing to the immense field open in time for the fertilizer industry in Canada. The aim of the report is stated to be to put before the Canadian public the latest view of experts in world economies that commercial fertilizers must be produced in ever-increasing amounts to maintain present yield and sustain a multiplying population and to show the amount of commercial fertilizer which Canada is using, might use, and may contribute to the world demand.

Contrasting with the value of the commercial fertilizer theoretically necessary to replace depletion of the soil is the actual figure of \$5,903,453. expended in Canada for purchased fertilizers in 1927. Though depletion of the soil is going on year after year the annual consumption of fertilizer in Canada is not increasing rapidly as is shown by the expenditure of \$4,408,330 in 1918. It is held that there is a boundless field in Canada for the manufacture of commercial fertilizer but that to reach the full benefit of the growing market awaiting the industry the Canadian demand must be strengthened by education of the farmers and in the rural schools, by practical demonstration of the value of fertilizers. Manufacturers producers and distributors need co-operation and the consolidation that other industries are finding necessary with a view to greater efficiency, uniform marketing and economy in production.

An interesting section of the 50 page mimeographed memorandum give figures to show how the present low rate of yield of the larger crops compared with that in other countries might be profitably increased by the use of commercial fertilizer as advised by the Department of Agriculture. Prevailing tariffs and Dominion Acts regulating sale and manufacture of commercial fertilizers, and fertilizer materials, whether wholly or partly manufactured in Canada. Copies of the publication may be obtained free of charge from the director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

SPECIAL FLOWERS

The real gardener will not be satisfied with just the ordinary run of flowers year after year, but requires many special varieties for particular purposes. There is, for instance, a shady corner in practically every garden but this should not be neglected. In fact, there are certain flowers which do especially well in such a location, many of them in fact better in partial shade than in an open position. According to Miss Isabella Preston, of the Dominion Experimental Farm, Aylsford, Candytuft, Clarkia, Marvel of Peru, Lupine, Larkspur (Annual), Godetia, Verbena, Phlox, Pansy, Nicotiana and Nemophila are recommended for shady positions. Even under the dense shade of our leafy trees, a brilliant show of Tuberous-Rooted Begonias, their wax-like flowers in an amazing array of colors, can be obtained. Then the flowers popularly known as the ever-lasting sort which will provide material for Winter bouquets. Chief among these is the Helichrysum, or straw flower. This is a hardy annual growing about two feet high and producing yellow, bronze, pink and red flowers. There are also Rhodanthe, Statice, Acoronium and several others. For preserving the flowers, pick with long stems just before the blooms open up fully and place. The Chinese lantern plant is hang upside down in some warm place, also grown for permanent indoor decoration, as the pods of this turn bright red and puff up like Chinese lanterns when dry.

A NATIONAL PROBLEM

A death in child-bed is almost a subject for an inquest. It is nothing short of a calamity which it is right we should all know about, in order to avoid it in the future. These words of Florence Nightingale apply to our present times just as truly as they did to her generation. We should indeed search for the reason why each year 1,300 Canadian women lose their lives as a direct result of their bringing new lives into the world.

The reasons have been sought for, and the results of such investigations particularly the one made by the Federal Department of Health, have shown why these mothers die. What is of the utmost importance is that we should know how to prevent most of these deaths. We know how to do so in the sense that we are aware of certain things which can be done, and which if they are done, will save many mothers lives.

Most of these deaths, which are such a tragedy to the home and such a loss to the nation, and which, frequently, are the cause of many social problems are due to the absence of ante-natal care and to the lack of adequate medical and nursing care at confinements. It has been proven beyond question of doubt that if ante-natal and confinement care are provided most of these maternal deaths can be and actually are prevented. There are two main reasons why women do not receive such care.

The first one is that comparatively few women realize that their own health—indeed, their lives—and the life and health of their expected baby depend upon ante-natal care. Both men and women should know that the expectant mother needs to be under medical supervision from the beginning of her pregnancy. It is early in pregnancy as well as during the late months that the physician detecting the first signs of an abnormal condition, promptly deals with this condition and so averts a catastrophe.

The second reason is lack of facilities, distance from the doctor. This is a problem which every part of our community should face and which all of us should do our utmost to solve. Adequate ante-natal and confinement services for all should be a national policy.

"Miss Gidding told me that you paid her such a charming compliment the other evening" said Mrs. Marbleby. "It was something about her being pretty. The poor girl was so pleased. I don't see how you men can be so untruthful." "I should think you'd know by this time that I'm never untruthful," said Mr. Marbleby, reproachfully. "I said she was just as pretty as she could be; and so she was!"

Welling News

(From our own correspondent)

With the grain and heels coming up the apple and plum trees in blossom, the trees all in leaf and many of the gardens up it gives Welling the appearance of a very fertile and prosperous district. The seeding is practically all finished and they have commenced cultivating beets.

Mr. and Mrs. Evans Stringham and daughter of Lethbridge were guests of Mr. and Mrs. A. M. Wilde Sunday afternoon.

Harold Evensen of Taber was a visitor here over the week end.

Mr. and Mrs. Jesse H. Wilde and Mrs. A. M. Wilde motored to Coaldale Sunday morning.

Mr. and Mrs. A. Peterson and son, Leon of Barnwell were visitors here Sunday. Leon will work for Floyd Wilde for a few days till his hired man, Ed Flexhaug gets over the mumps.

Julia Cox returned home from the Galt Hospital last Tuesday.

Those from Welling who attended the opening dance at the Waterton Lakes Pavilion last Friday were Myrtle, Violet and Jenny Schumers and George and James Thomson. They report a wonderful time. A few from here went to the opening dance of the Magrath Pavilion on Sat. night.

Mr. and Mrs. Bruce Balderson and family and Mr. and Mrs. G. V. Balderson and family spent Friday the 24th at Waterton. They have purchased a motor boat and they took this up with them.

They have commenced thinning beets. Donald E. Wilde has 1/4 acre thinned.

Mr. and Mrs. Lynn Bullock and family of Barnwell spent Sunday afternoon here visiting with relatives.

Mr. Karl Kohler went up to the Peace River district Saturday to look at some land. He is thinking of buying and settling there.

U. F. A. WHEAT POOL MEETING

A very important U. F. A. Meeting will be held Monday, June 3, 1929, at which every U. F. A. member should be present. Business of importance will be the election of a delegate to represent the Raymond district in the Wheat Pool, and the choosing of a delegate to wait upon the C. P. R. officials re trackage and the building of the new Pool Elevator at Anderson about midway between Raymond and Welling. Don't forget, Monday night, June 3 rd.

NOTICE

The U. F. W. A. are meeting Thursday, June 6th, at the home of Mrs. T. O. King. The assisting hostesses will be Mrs. M. T. King, Mrs. Owen King and Mrs. Mable Heninger.

The Magrath local will present the following program:—

Piano Solo—Mrs. Maude Ririe.
Talk, "Literature in the Home,"—Mrs. Flora Norton.

Reading—Mrs. Harold Stevens.

Paper, "Uses and Abuses of the Homely Tin Can"—Mrs. I. R. Bennett.
Vocal Solo—Mrs. Theodore Ehler.

Product of General Motors

FRIGIDAIRE is a product of the world's largest organization of electrical, mechanical and chemical engineers. It is backed by the vast resources of General Motors. Great value at low price has placed more Frigidaires in use than all other electric refrigerators combined. Can be operated from farm electric plants. Let us show you the latest models.

POOL TERMINAL STORAGE TO BE INCREASED

The Alberta Wheat Pool is continually increasing its elevator system. On Monday of this week the contract was let, more than doubling the storage of the new Pool terminal at Vancouver. The number of Pool elevators in Alberta has been increased until the total is close to the 400 mark.

The Pool's continual objective is to handle as much of its members' wheat as possible through Pool elevators. Each year sees an increase in the volume of Pool wheat handled through Pool facilities. This year the total is around 65 per cent.

The new Vancouver terminal was completed last fall and had storage facilities to handle 2,500,000 bushels of wheat. With the proposed additional storage of 2,750,000 this elevator will have a total capacity of 5,250,000 bushels. This will provide total terminal space owned and controlled by the Alberta Wheat Pool on the Pacific coast of 15,150,000 bushels.

The contract for building the additional storage in Terminal No. 1 was let to Carter, Hall and Aldinger of Winnipeg. C. D. Howe and Company Port Arthur, are consulting engineers.

A total of 27,335 cars entered the Rocky Mountain National Park through the Kananaskis gate during the year ending March 31, 1928, according to the recently issued report of the this number 25,800 were Canadian cars and 1,535 were American. Waterton Lakes Park in Southern Alberta attracted 15,547 motor tourists while Buffalo and Elk Island Parks had 12,679 and 16,138 visitors respectively and Jasper Park, which is accessible as yet only by railway, had approximately 12,000 visitors.

DEPARTMENT OF AGRICULTURE TESTING CHEMICAL WEED DESTROYER

It has come to the attention of the Department of Agriculture that certain persons have been recommending to farmers a chemical preparation for the destruction of noxious weeds, and in published statements testifying to the value of this preparation have represented themselves as being connected at the time with the Department.

This created an impression which should be corrected, and it may be pointed out that the Department accepts no responsibility for statements of this kind from unauthorized sources. Experiments have been carried out by the Field Crops Branch of the Department during the past year to determine the efficiency of the various chemical weed destroyers which are now on the market, and further intensive tests will be conducted this year under the direct supervision of the Field Crops Commissioner. At the conclusion of these experiments an official statement of the results showing the comparative value of these chemicals will be issued, and until that time no reports as to the findings of the Department in this connection can be considered as authoritative.

AMENDMENTS MADE ALTA. IN- SURANCE ACT

Edmonton, May 20.—Amendments to the Alberta Insurance Act as passed at the last session of the legislature have been proclaimed and are now in effect. One of the most important provisions of the amended act is the withdrawal of the right to apply for hall insurance by telegram or telephone, and the requirements that now he must accompany his application with payment of the premium.

News Notes

Mr. and Mrs. Kenneth Allred were in Cardston on Friday for the Track Meet.

Geo. W. Green Sr. and son, were in Raymond on Saturday looking after their interests here.

J. E. Clark and children motored to Cardston on Friday, returning early Saturday morning.

The roads from Raymond to Cardston via Magrath and Sp. Coulee are pretty good now.

Sunday and Monday the weather was windy, cloudy and cold. Tuesday was bright and a great deal warmer.

The prize-list of the Calgary Exhibition and Stampede, July 8-13, came to hand last week. This year's Stampede promises to be the best ever.

Nolan Jeffrey left on Tuesday for Banff where he has been offered a position in the office of the Crag and Canyon. Good luck Jeff.

The wind and intermittent showers at Waterton Park on Friday spoiled the enjoyment of kiddies and grown-ups too. Mountain air is still quite cool.

A. Weideman, Magrath, of the Garden City Oil Co. Ltd. was here on Thursday, and helped B. Poulsen put up their big sign on the Service Station.

"SAFETY WEEK" IS WORTHY CAMPAIGN FOR ALL ALBERTA

With the accident toll on a fairly heavy scale in Alberta, there is a real necessity for towns and other district centers to adopt a Safety Week campaign. This has been introduced in other parts of the country and met with gratifying success.

The motor traffic season will soon be at its height. Not only will Alberta citizens be using their cars practically all of the time, but newcomers will be streaming in from all directions.

Under such conditions, the clarion call is for safety. To cut down the accident toll is a first duty of all drivers, and that can only be brought about by initiating and observing safety measures.

Brake testing, headlight checking, and stressing of careful driving can be well emphasized in any safety week campaign. Even the period might be made longer without impairing its benefits one little bit.

In undertaking any safety campaign towns and other municipal authorities will find that there will be 100 per cent support from officers, officials or members of the Alberta Motor Association. That body stands ready at all times to promote and obtain the fullest possible amount of safety for all motor drivers using the highway of this province.

And try a Recorder Want-ad. when you have anything to buy, sell, trade, or exchange. The cost is small and your message gets to the reading public so much quicker.

Try a Want-ad. next time.

FOUND—A bunch of keys. Owner may obtain same by calling at this office and paying for this ad.

FOR SALE CHEAP—A used Beet Cultivator. See it at the Raymond Mercantile.

FOR SALE—A three-piece Tapestry Chesterfield Suite, a child's crib and a high chair all at a bargain price.—Apply Mrs. O. S. Longman, Phone 68 tmc.

Thos Allen and party were Waterton Park visitors on Friday.

Four large signboards are being erected in Raymond for outdoor poster advertising. Deal Mendenhall is local representative of the advertising agency doing this work. He also has Cardston and Magrath as his territory and four signboards will be put up in each of these towns as well.

CRUDE OIL IS STRUCK 45 MILES EAST OF WAINWRIGHT

Meridian No 1 Strikes Heavy Crude at 1827 Feet—Well Looking to be Good for 500 Barrels a Day — Bailing Doesn't Lower.

Calgary, May 20.—Ten feet below where it brought in from 20,000,000 to 30,000,000 cubic feet of gas last October Meridian No 1 well 45 miles east of Wainwright, has struck heavy crude oil at 1,827 feet in the Blairmore strata according to Leo H. Miller, managing director of Ribstone Oils, Ltd. who returned from the field Monday morning.

Heavy crude oil with a gravity of from 18 to 20 Baume is standing 380 feet up the hole and after bailing for one hour, 20 barrels were taken out without lowering the level appreciably Mr. Miller said. This would yield about 500 barrels each 24 hours. The oil is clean and has no water, Mr. Miller told the Herald. Tankage and equipment is being ordered and officials of the company expect to have the well on the pump within two weeks, when the rough tests will be made over a period of weeks to determine the production.

Although the well brought in oil in great quantities early last week, bailing tests lowered the level and it was not until during the week-end after cleaning and bailing had been carried on that results were obtained which made the well look as though it were capable of producing in the neighborhood of 500 barrels a day, Mr. Miller explained.

O'Brien Building

Raymond

Mrs. E. McBride was the guest of honor at a very delightful surprise birthday party at her home Monday the occasion being her 72nd birthday. Conversation, games, and dainty refreshments occupied the afternoon. Those present were: Mesdames H. S. Allen, Holmes, Selman, Wooley, Redd Rasmussen, Hicken, P. McBride, Fred Wilde, I. R. McBride and C. D. Peterson.

Raymond is not the only town having its housing problems. Calgary and Lethbridge are afflicted with growing pains right now.

The new Lethbridge Collegiate is a sorry looking wreck after the 60,000 fire on Victoria Day early morning. Repairs are going on now and it will be ready again for the fall term.
